Razom: Forging the Future in Ukraine

Presented by: Leslie Wilson, Disaster Response & Vulnerable
Population Specialist, Pro Bono

Speaker Bio: Leslie Wilson is a visionary with diverse skills forged in disaster response, tempered by 18 years in emergency management. Prior careers in IT and off-grid permaculture also play a critical role in Ukraine. Highlights: state subcontractor (COVAX pods), FEMA reservist (many national disasters), SRA Emergency Preparedness & Response Analyst (federal projects, DC area), Red Cross International & Disaster Services (Disaster Services Coordinator/Manager in DC area/California + 15-year volunteer). Internationally she volunteered in post-quake Haiti 2010 before five trips spanning 11 years of pro bono work in Tajikistan as liaison/consultant/partner with Red Crescent, Aga Khan Foundation, Organization for Security and Cooperation in Europe (OSCE), and many CSOs on national/international levels.

Since May 2022, Ms. Wilson has immersed herself in the culture and wartime challenges of the Ukrainian people to better understand the most urgent unmet needs. She is establishing a wide-ranging network to aid in the survival, recovery, and rebuilding of the nation through the Resilient Village concept.

Veteran PRO Center Opens in Bucha, Ukraine
A Place to Return. A Place to Rebuild. ...more

A place to return
A place to rebuild

February 2026
Bucha's Veteran PRO Center Opens!

In mid-February 2026, a new chapter quietly began in Bucha.

The opening of the Veteran PRO Center marked more than the launch of another public service facility—it signaled a continued commitment to those who have carried the weight of war and are now navigating the path back to civilian life. This center is the 16th Veteran PRO hub established across the Kyiv region, created through a coordinated effort between the Kyiv Regional Military Administration, the Bucha City community, and the Ministry of Veterans Affairs of Ukraine.

A Single Place for Complex Needs

For many veterans and their families, the transition home is not defined by a single challenge—but by many, all at once.

The Veteran PRO Center is designed to meet that reality.

Here, visitors can access integrated, day-to-day support, including:

Legal consultations to navigate rights, benefits, and administrative processes

Employment and entrepreneur assistance

Psychological support

Social protection guidance tailored to each family's situation

Representatives from key government services are physically present on-site, including:

* The Center for Administrative Services (CNAP)

* Pension Fund specialists

* State Employment Service advisors

This co-location removes barriers, reduces bureaucracy, and restores something often lost in complex systems: time, clarity, and dignity.

Built with Respect

Every detail of the Bucha center reflects a deeper principle: accessibility is not optional.

The facility is fully inclusive, so veterans of all abilities can move, engage, and receive services without friction or compromise.

Veterans Supporting Veterans

Leadership matters—and in Bucha, it's personal.

The center is guided by veteran community leaders, like combat officer Valentyn Oleksiienko, who returned from front-line service and rehabilitation to serve by helping others navigate similar difficult transitions.

This peer-led approach builds trust in ways institutions cannot.

Beyond the Building

Inclusive transport vehicles

Mobility is often an invisible barrier.

These minibuses ensure support is not only available but reachable.

Why It Matters

Projects like the Veteran PRO Centers are not isolated initiatives. They are part of a broader shift toward community-based resilience—where recovery is not centralized, but embedded locally.

They demonstrate what it looks like when infrastructure is designed around people. And they offer a model that can inform efforts far beyond Ukraine.

Looking Ahead

As we continue to develop and share the vision of Resilient Village Ukraine, centers like this provide a real-world foundation:

* Integrated services

* Veteran-led leadership

* Accessibility by design

* Community-level implementation

These are not abstract ideas. They are already working—today—in places like Bucha, Ukraine.

Ukraine: Promise for the Future

**Ministry of Defence
of Ukraine**

Central Directorate for Civil-Military Cooperation (CIMIC).

Key 2026 Activities & Roles

- **Support Services:** As of early 2026, social support subdivisions are subordinated to the Directorate, providing comprehensive assistance, including legal and medical rehabilitation for defenders.
- **Reintegration Focus:** U.S.-supported, the Directorate's Rehabilitation Department is running trainings to enhance skills for supporting veterans and families of missing/captured soldiers, focusing on trauma-informed care.
- **Cultural & Humanitarian Aid:** CIMIC officers, working with the 25th Airborne Brigade, were involved in the 2026 evacuation of cultural assets, such as Polovtsian stone sculptures from frontline, Donetsk Region areas.
- **International Cooperation:** The Directorate maintains strong partnerships for rehabilitating families of Ukrainian defenders, including ongoing programs with the Spanish Ministry of Defence.
- **Search Operations:** Collaborative trainings with the International Committee of the Red Cross (ICRC) are being held in 2026 to train specialist groups for finding, identifying, and recovering the remains of missing personnel.

Strategic Context

CIMIC officers continue to be essential in identifying and assessing the civilian environment, aiding in civilian harm tracking, and maintaining communication between military units and local populations

2025 Proposal

Civilian-Military Goodwill Programs

- Rebuild Hostomel House while learning RMH/Cob techniques at 1st R&D site
- Train local military to teach newly learned skills to local civilians adding their own military experience to enhance the learning:
 - Cob building projects
 - Rocket Mass Heating/EkoPich construction for winter heating & cooking
 - Power Food Cookoff – Invite local population for super-food & judging
- Train civilians in local defense (firearms, explosives detection, TacMed, John Spencer's program....)
- Train civilians to take over non-soldier tasks:
 - o contacting family of KIA, MIA, POW, wounded...
 - o logistics of moving soldier's gear when above happens
 - o errand running for confined soldiers, other off-base needs
 - o hospital/medical civilian volunteers (where appropriate)
- Establish local humanitarian teams to help meet military's unmet needs:
 - o funds/supplies for impoverished soldiers, ...
 - o invitations to special local events, social gatherings, church services, free meal program
 - o providing transportation, delivery services, local tours
 - o Help civilians clean up war debris at their homesites, especially as part of the **Asbestos Containment Project**

Asbestos Containment Project
a Grassroots Solution for an Enormous Problem

Building, trucking away, creating toxic mountains laden with asbestos chunks and dust creates a widespread secondary contamination of the Ukrainian landscape. It's incubating major health concerns for decades to come.

Miyamoto International experts, including a professor at KNUBA, are advising us to help create a "pragmatic" solution.

miyamotointernational.com/addressing-ukraines-asbestos-crisis/

knu.edu.ua

Safely isolating, entombing the asbestos on the original site, (much like the Chernobyl reactor) prevents further spreading of this carcinogenic material.

Asbestos Roof Tiles
broken tiles

Researching better handling techniques for homeowners and volunteers exposed to asbestos and other dangerous war debris.

3 Crisis Intervention Systems in Place in the World

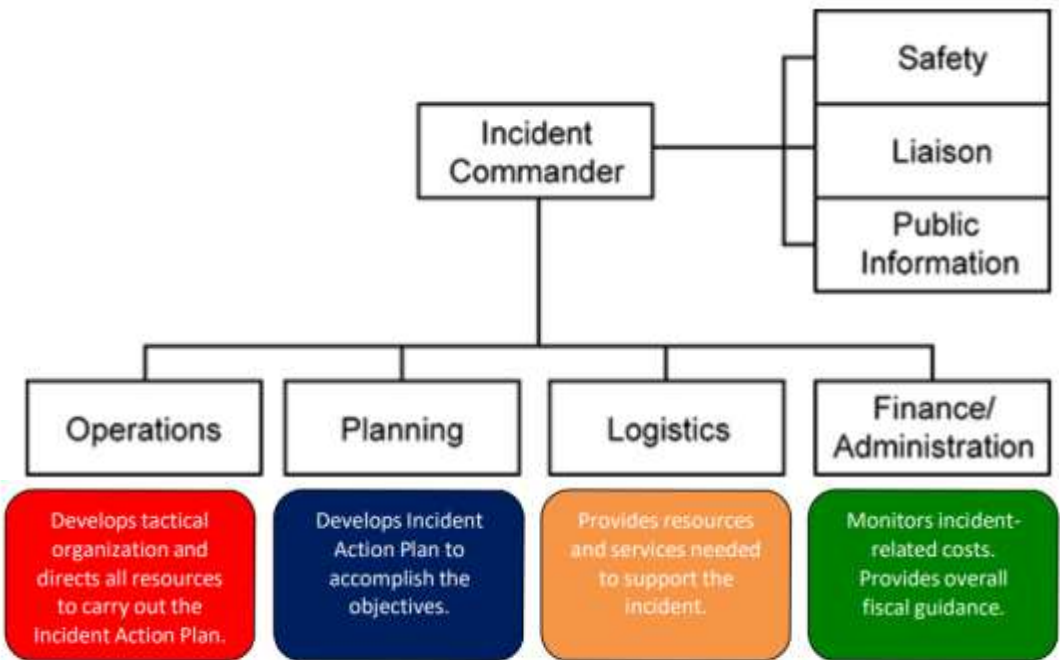

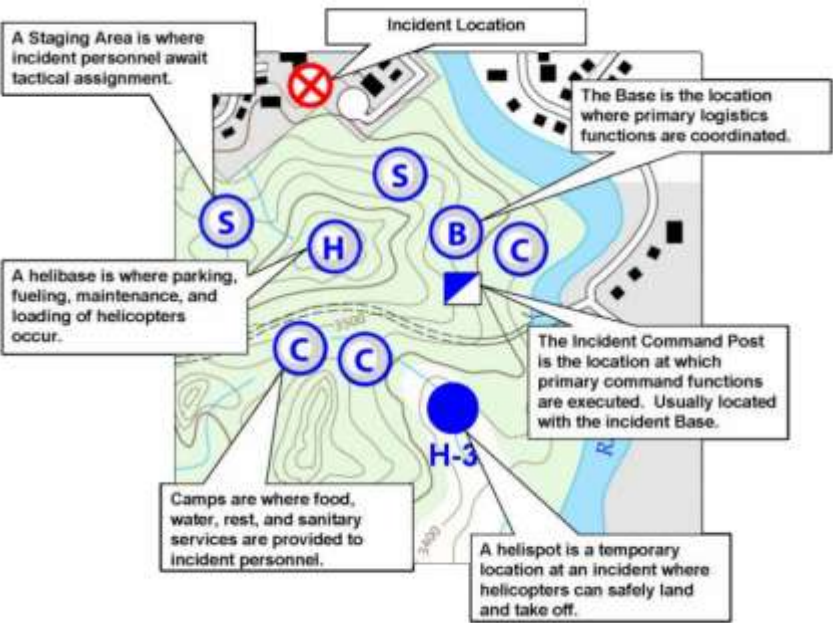

UN professionals incorporate these 3 programs into the fabric of UN staff support:

- **Early Medical-Psychological Intervention** program developed by Dr. Louis Crocq at the French Institute for Research and Education in Trauma and Stress in Paris, France
- **Acute Trauma Management** program of the American Academy of Experts in Traumatic Stress
- **Critical Incident Stress Management program (CISM) of the International Critical Incident Stress Foundation (ICISF)**

Assisting Individuals in Crisis & Group Crisis Intervention
Kyiv Theological Seminary 2025

Concepts from America, NATO, the Global Emergency Management Community

The Incident Command System (ICS) is an essential framework designed to

- create a unified response strategy
- manage emergencies efficiently,
- streamline decision-making
- reduce confusion
- provide clarity, structure, coordination for responders
- promote collaboration among agencies, governments

Whether addressing natural disasters, large-scale events, or public health crises, ICS ensures swift, effective actions. ICS enhances the ability to save lives, protect property, and minimize damage during critical situations.

Military Mental Health

January 23, 2023

As the war in Ukraine continues, the concern for the mental health of the soldiers and the citizens grows. Around the world we see evidence of the scars of battle, not only physical, but emotional as well. One can only imagine the horrors that linger in the minds of those who have faced war head on. Let's give our attention to those soldiers, and how to understand and support their mental health and battles with PTSD.
